# 2J Series Brakes

## VertiLoc® Brake

A popular side-operated brake that employs cam action to lock brake pad across entire surface of wheel tread. Brake locks wheel only, and the swivel radius of the caster is not affected by this brake design. All steel construction provides positive, reliable braking under a variety of operating conditions and wheel tread types. To order as factory installed swivel caster option, add "VL" to end of caster model number. To field install brake, see Brake Kit Number chart below.

Vinyl brake contact available. Consult Acorn™.

Caster Wheel Diameter	13-28 Series Zinc	135-285 Series Nickel	W13-W28 Series Zinc	30-40 Series Zinc	305-405 Series Nickel	S30-S40 Series SS
3"	E 53	E 30	E 63	E 63	E 69	
3-1/2"				E 64	E 62	
4"	E 54	E 31 E68	E 68	E 61 SS	E 64	
5"	E 55	E 32	E67	E 67	E 77	SS E 65
6"				E 66	E 6	SS E 66

VertiLoc Brake Kit includes brake axle & nut, brake pedal and shoe lever.

# 2J Series Brakes

## VertiLoc HD® Brake

This brake features the same basic design as the VertiLoc brake shown above except that this model is designed for use on heavier duty casters and wheels. It also employs a cam action to lock brake pad across entire surface of wheel tread. Brake locks wheel only, and the swivel radius of the caster is not affected by this brake design. All steel construction provides positive, reliable braking under a variety of operating conditions and wheel tread types. To order as factory installed swivel caster option, add "VL" to end of caster model number. To field install brake, see Brake Kit Number chart below.

Vinyl brake contact available. Consult Acorn™.

Caster Wheel Diameter	Brake Kit Number				81 Series Stainless Steel Brake Kits	
	130-136 Series Zinc	61 Series Zinc	81 Series Zinc	81KPL Series Zinc	Metal Brake Contact	Vinyl Brake Contact
3"	E 46					
4"	E 50	E 90	E 84	E 84	SSE 84	SSE 84VY
5"	E 51	E 89	E 85	E 85	SSE 85	SSE 85VY

## PosiLoc® Brake

A simple, effective toe-activated wheel brake that provides excellent braking action on a variety of wheel types and tread surfaces. Brake locks wheel only. Thermoplastic black brake pedal offers easy engagement and disengagement of brake. Stainless steel construction. To order as factory installed swivel caster option, add "PL" to end of caster model number.

Note: Melting point of brake pedal is +421° F.

To field install brake, see Brake Kit Number chart.

Taupe and red brake pedals optionally available, consult Acorn™.

Caster Wheel Diameter	Brake Kit Number	
	W13-W28 Series Zinc	30-40 Series Zinc
3"	3005-27	3005-27
3-1/2"		3005-37
4"	3005-47	3005-47
5"	3005-57	3005-57
6"	3005-67	

Brake kit includes brake housing and pedal as one unit. Existing caster axle & nut will work with this design.

## PosiLoc HD® Brake

A heavy duty version of the PosiLoc brake shown above specially designed for larger casters and heavier loads. A simple, effective toe-activated wheel brake that provides excellent braking action on a variety of wheel types and tread surfaces. Brake locks wheel only. Thermoplastic black brake pedal offers easy engagement and disengagement of brake. To order as factory installed swivel caster option, add "PL" to end of caster model number.

Note: Melting point of brake pedal is +421° F

To field install brake, see Brake Kit Number chart.

---

## SideLock Brake

Cam activated brake exerts pressure on side of wheel hub for solid braking power. Large wing-shaped foot pedal is easily accessed, and brake can be locked from either end of the pedal for operator ease. A proven industrial brake design that locks wheel only. To order as factory installed swivel caster option add "SLB" to end of caster model number. To field install brake, see kit numbers.

## Hex Head Brake

Threaded bolt activates pressure directly to the side of the wheel when turned by wrench. Locking action is positive and secure for those applications where equipment must remain stationary for long periods of time. This style brake is commonly used on low profile Business Machine casters. To order add "HHBRK" to end of caster model.

## Thumb Screw Brake

Threaded bolt activates pressure directly to the side of the wheel when turned by thumb pressure. Locking action is positive and secure for those applications where equipment must remain stationary for long periods of time. This style brake is commonly used on low profile Business Machine casters. To order add "TSBRK" to end of caster model.
