

Little Giant Ladders® - Type 1 Ladders

GET THE CONVENIENCE OF 24 LADDERS IN ONE!

Now you can replace all your old ladders with the convenient 24 in one Little Giant Type 1 Ladder. You'll get the ultimate in strength, safety and versatility.

Safety

Little Giant Ladders are designed to be the safest ladder on the planet. Since it's adjustable, the Little Giant can be used safely on stairs, ramps, curbs, docks or other uneven surfaces.

Strength

The Little Giant is made of heavy-wall, 6005-T5 aluminum—the very same material used in aerospace construction. So it's ultra-strong while remaining light and portable. In fact, The Little Giant Type 1 is government-rated to hold up to 250 pounds. So it's perfect for medium-sized jobs.

Versatility

No other ladder gives you the versatility of a Little Giant. Independent tests prove the Little Giant will replace 60-70% of all portable ladders currently being manufactured. When you buy a Little Giant, you're not just getting one ladder. You're getting 24 different ladders combined to make the world's most versatile ladder system.

Little Giant Type 1 Features:

- Heavy-wall aircraft-grade aluminum construction
- 250-pound government weight rating
- Combines 24 different ladders into one convenient system
- Lightweight and portable
- Complies with all applicable OSHA ANSI A14.2 standards
- Includes a limited lifetime warranty

LITTLE GIANT CONFIGURATIONS

A-Frame Ladder

With a simple click of the patented hinge, the Little Giant can be used as a traditional A-Frame ladder.

Staircase Ladder

Because it's adjustable in one-foot increments, the Little Giant allows one side of the ladder to be extended allowing safe use on uneven surfaces like staircases, curbs or docks.

90° Ladder

Traditional ladders make working close to walls nearly impossible. With the Little Giant, one adjustment allows you to safely work against any vertical surface.

Extension Ladder

For large projects the Little Giant easily converts to a stable extension ladder allowing you to reach rooftops, tree limbs and more with ease.

Scaffolding

Just add the Little Giant work plank (sold separately) to your Little Giant ladder and you've got a convenient scaffolding

Model #	17	22

Little Giant Ladders® - Type 1A Ladders

Safety

The Little Giant is designed to be the safest ladder on the planet. Since it's adjustable, the Little Giant can be used safely on stairs, ramps, curbs, docks or other uneven surfaces. And, with the new patented triple-locking hinge, the Little Giant Ladder is sturdier than ever in the extended position.

Strength

The Little Giant is made of heavy-wall, 6005-T5 aluminum, the very same material used in aerospace construction. So it's ultra-strong while remaining light and portable. In fact, The Little Giant Type 1A is government-rated to hold up to 300 pounds, but has survived brutal stress testing of up to 1200 pounds with absolutely no structural failure.

Versatility

No other ladder gives you the versatility of a Little Giant. Independent tests prove the Little Giant will replace 60-70% of all portable ladders currently being manufactured. When you buy a Little Giant, you're not just getting one ladder. You're getting 24 different ladders combined to make the world's most versatile ladder system. Plus, the addition of easy roll wheels makes your Little Giant easy to maneuver and store.

Little Giant Type 1A Features:

- Patented Triple-Locking Hinges™
- Tip & Glide Wheels™ with models 17, 22 and 26
- Heavy-wall aircraft-grade aluminum construction
- Rated to hold up to 300 lbs.
- Combines 24 ladders into one convenient ladder system
- Lightweight and portable
- Complies with all applicable OSHA & ANSI A14.2 standards
- Includes a full Lifetime Warranty

Little Giant Ladders® - Type 1AA Ladders

FOR HEAVY-DUTY JOBS!

When you need industrial-strength, only one ladder will do—the Little Giant Type 1AA. It's government rated to a whopping 375 pounds, so you know it can stand up to even the most demanding applications. And because it's a Little Giant, the Type 1AA gives you the advantages of traditional A-frame ladders, extension ladders, stepladders and even scaffolding—all in one convenient package.

Safety

Little Giant Ladders are designed to be the safest ladder on the planet. Since it's adjustable, the Little Giant can be used safely on stairs, ramps, curbs, docks or other uneven surfaces.

Strength

The Little Giant is made of heavy-wall, 6005-T5 aluminum—the very same material used in aerospace construction. So it's ultra-strong while remaining light and portable. In fact, The Little Giant Type 1 is government-rated to hold up to 250 pounds. So it's perfect for medium-sized jobs.

Little Giant Ladders® - Fiberglass Ladders

GET THE SAME LITTLE GIANT QUALITY IN A FIBERGLASS LADDER! Now it's easy to get the same legendary quality of a Little Giant aluminum ladder in a non-conductive fiberglass model. The Little Giant Fiberglass Type 1A features nonconductive fiberglass side rails, so it's perfect for electrical contractors. And thanks to an all-new solid hinge design, the Little Giant Fiberglass Type 1A is the strongest, most technically advanced fiberglass ladder on the market.

Safety

Little Giant Ladders are designed to be the safest ladder on the planet. And because it's constructed of nonconductive fiberglass resin, the Little Giant Fiberglass Type 1A is perfect for working safely around electricity.

Strength

The Little Giant Fiberglass Type 1A is made of a patented fiberglass resin. So it's both stronger and lighter than traditional fiberglass ladders. In fact, The Little Giant Fiberglass Type 1A is stress rated for industrial use.

Versatility

No other ladder gives you the versatility of a Little Giant. Independent tests prove the Little Giant will replace 60-70% of all portable ladders currently being manufactured. When you buy a Little Giant, you're not just getting one ladder. You're getting 24 different ladders combined to make the world's most versatile ladder system.

Little Giant Fiberglass Features:

- Tip & Glide Wheels™
- Patented nonconductive fiberglass side rails
- Rated to hold up to 300 lbs.
- Combines 24 different ladders into one convenient system
- Lightweight and portable
- Complies with all applicable OSHA ANSI A14.2 standards
- Includes a full 1-year warranty

LITTLE GIANT CONFIGURATIONS

A-Frame Ladder

With a simple click of the patented hinge, the Little Giant can be used as a traditional A-Frame ladder.

Staircase Ladder

Because it's adjustable in one-foot increments, the Little Giant allows one side of the ladder to be extended allowing safe use on uneven surfaces like staircases, curbs or docks.

90° Ladder

Traditional ladders make working close to walls nearly impossible. With the Little Giant, one adjustment allows you to safely work against any vertical surface.

Extension Ladder

For large projects the Little Giant easily converts to a stable extension ladder allowing you to reach rooftops, tree limbs and more with ease.

Scaffolding

Since the Little Giant pulls apart to form two scaffold trestles, you just add the Little Giant work plank (sold separately) to form a convenient scaffolding system.

Little Giant Ladders® - Skyscraper Ladders

INTRODUCING THE WORLD'S TALLEST A-FRAME

LADDER! Where other ladders fall short, the SkyScraper from Little Giant goes above and beyond. The SkyScraper is indeed the world's tallest a-frame ladder with a maximum height of 21-feet, making ceiling-height work simple and safe. The SkyScraper is perfect for churches, auditoriums, gymnasiums and other industrial applications. Plus it's ideal for working over benches and stadium seating. And because it's portable, the SkyScraper can be used in places where a motorized lift or bulky scaffolding simply can't go.

Safety

The SkyScraper is designed to be the safest ladder on the planet. Since it's adjustable, the Little Giant can be used safely on stairs, ramps, curbs, docks or other uneven surfaces.

Strength

The SkyScraper is made of heavy-wall, 6005-T5 aluminum—the very same material used in aerospace construction. So it's ultra-strong while remaining portable. In fact, The SkyScraper is government-rated to hold up to 300 pounds, so it can handle virtually any industrial application.

Versatility

No other industrial, A-frame ladder gives you the versatility of a SkyScraper. One SkyScraper takes the place of expensive motorized lifts, bulky scaffolding and flimsy extension ladders. Plus it's adjustable for safe use on uneven surfaces.

Little Giant Type 1 Features:

- Heavy-wall aircraft-grade aluminum construction
- Rated to hold up to 300 lbs.
- Adjustable for use on stairs, curbs, docks and more
- Perfect for churches, gymnasiums or auditoriums
- Complies with all applicable OSHA ANSI A14.2 standards
- Full 5-year Warranty
